Subject index to volume 46

Analytical microscopy
Factors influencing the precision of quantitative scanning transmission electron microscopy, *Müller, Goldie, Bürki, Häring and Engel* 46 (1992) 317

Cryomicroscopy
Electron cryomicroscopy of frozen-hydrated biological specimens: analysis of freezing artifacts by X-ray cryocrystallography, *Lepault, Ranck and Erk* 46 (1992) 19
Desired features of a cryoelectron microscope for the electron crystallography of biological material, *Zemlin* 46 (1992) 25
Three-dimensional reconstruction of single particles negatively stained or in vitreous ice, *Frank and Radermacher* 46 (1992) 241
Quantitative energy-filtered electron microscopy of biological molecules in ice, *Langmore and Smith* 46 (1992) 349

Detectors, photographic and other
Performance of a low-noise CCD camera adapted to a transmission electron microscope, *Kujawa and Krahl* 46 (1992) 395
The photographic emulsion as analog recorder for electrons, *Zeitler* 46 (1992) 405

Diffraction and optical diffraction
Combination of EELS modes and electron spectroscopic imaging and diffraction in an energy-filtering electron microscope, *Reimer, Fromm, Hirsch, Plate and Rennekamp* 46 (1992) 335

Electron energy loss spectroscopy
Combination of EELS modes and electron spectroscopic imaging and diffraction in an energy-filtering electron microscope, *Reimer, Fromm, Hirsch, Plate and Rennekamp* 46 (1992) 335
Quantitative energy-filtered electron microscopy of biological molecules in ice, *Langmore and Smith* 46 (1992) 349

High resolution
Image contrast in high-resolution electron microscopy of biological macromolecules: TMV in ice, *Henderson* 46 (1992) 1
Computer-controlled spot-scan imaging of crotoxin complex crystals with 400 keV electrons at near-atomic resolution, *Brink, Chiu and Dougherty* 46 (1992) 229

High voltage
Computer-controlled spot-scan imaging of crotoxin complex crystals with 400 keV electrons at near-atomic resolution, *Brink, Chiu and Dougherty* 46 (1992) 229

Historical
The photographic emulsion as analog recorder for electrons, *Zeitler* 46 (1992) 405

Image processing, 3D reconstruction
A brief look at imaging and contrast transfer, *Wade* 46 (1992) 145
Image restoration for biological objects using external TEM control and electronic image recording, *Typke, Hegerl and Kleinz* 46 (1992) 157
Magnification mismatches between micrographs: corrective procedures and implications for structural analysis, *Aldroubi, Trus, Unser, Booy and Steven* 46 (1992) 175
Computer-controlled spot-scan imaging of crotoxin complex crystals with 400 keV electrons at near-atomic resolution, *Brink, Chiu and Dougherty* 46 (1992) 229
Three-dimensional reconstruction of single particles negatively stained or in vitreous ice, *Frank and Radermacher* 46 (1992) 241
Processing images of helical structures: a new twist, *Morgan and DeRosier* 46 (1992) 263
From lattice distortion to molecular distortion: characterising and exploiting crystal deformation, *Saxton, Dürr and Baumeister* 46 (1992) 287
Correlation functions revisited, *Van Heel, Schatz and Orlova* 46 (1992) 307
A brief survey of software packages for image processing in biological electron microscopy, *Hegerl* 46 (1992) 417

Imaging
Automatic focus correction for spot-scan imaging of tilted specimens, *Downing* 46 (1992) 199
Automated microscopy for electron tomography, *Koster, Chen, Sedat and Agard* 46 (1992) 207

Elsevier Science Publishers B.V.

Combination of EELS modes and electron spectroscopic imaging and diffraction in an energy-filtering electron microscope, *Reimer, Fromm, Hirsch, Plate and Rennekamp* 46 (1992) 335

Instrumentation

Desired features of a cryoelectron microscope for the electron crystallography of biological material, *Zemlin* 46 (1992) 25

Image restoration for biological objects using external TEM control and electronic image recording, *Typke, Hegerl and Kleinz* 46 (1992) 157

Overview of computer-aided electron microscopy, *Downing, Koster and Typke* 46 (1992) 189

Automatic focus correction for spot-scan imaging of tilted specimens, *Downing* 46 (1992) 199

Automated microscopy for electron tomography, *Koster, Chen, Sedat and Agard* 46 (1992) 207

Methods and techniques

Specimen flatness of thin crystalline arrays: influence of the substrate, *Glaeser* 46 (1992) 33

2D crystallization: from art to science, *Jap, Zulauf, Scheybani, Hefti, Baumeister, Aebi and Engel* 46 (1992) 45

Has negative staining still a place in biomacromolecular electron microscopy?, *Bremer, Henn, Engel, Baumeister and Aebi* 46 (1992) 85

Metal decoration of biomacromolecules and molecular assemblies: a review, *Weinkauf and Bachmann* 46 (1992) 113

Magnification mismatches between micrographs: corrective procedures and implications for structural analysis, *Aldroubi, Trus, Unser, Booy and Steven* 46 (1992) 175

New developments

Metal decoration of biomacromolecules and molecular assemblies: a review, *Weinkauf and Bachmann* 46 (1992) 113

Site-specific cluster labels, *Hainfeld* 46 (1992) 135

Image restoration for biological objects using external TEM control and electronic image recording, *Typke, Hegerl and Kleinz* 46 (1992) 157

Overview of computer-aided electron microscopy, *Downing, Koster and Typke* 46 (1992) 189

Automatic focus correction for spot-scan imaging of tilted specimens, *Downing* 46 (1992) 199

Automated microscopy for electron tomography, *Koster, Chen, Sedat and Agard* 46 (1992) 207

Processing images of helical structures: a new twist, *Morgan and DeRosier* 46 (1992) 263

From lattice distortion to molecular distortion: characterising and exploiting crystal deformation, *Saxton, Dürr and Baumeister* 46 (1992) 287

Performance of a low-noise CCD camera adapted to a transmission electron microscope, *Kujawa and Krahl* 46 (1992) 395

Scanning transmission electron microscopy

Factors influencing the precision of quantitative scanning transmission electron microscopy, *Müller, Goldie, Bürki, Häring and Engel* 46 (1992) 317

Scanning tunneling microscopy

Quantitative scanning tunneling microscopy and scanning force microscopy of organic materials, *Butt, Guckenberger and Rabe* 46 (1992) 375

Specimen preparation

Specimen flatness of thin crystalline arrays: influence of the substrate, *Glaeser* 46 (1992) 33

2D crystallization: from art to science, *Jap, Zulauf, Scheybani, Hefti, Baumeister, Aebi and Engel* 46 (1992) 45

Has negative staining still a place in biomacromolecular electron microscopy?, *Bremer, Henn, Engel, Baumeister and Aebi* 46 (1992) 85

Metal decoration of biomacromolecules and molecular assemblies: a review, *Weinkauf and Bachmann* 46 (1992) 113

Site-specific cluster labels, *Hainfeld* 46 (1992) 135

Surfaces, clusters, interfaces and particles

2D crystallization: from art to science, *Jap, Zulauf, Scheybani, Hefti, Baumeister, Aebi and Engel* 46 (1992) 45

Site-specific cluster labels, *Hainfeld* 46 (1992) 135

Thick specimens

Specimen flatness of thin crystalline arrays: influence of the substrate, *Glaeser* 46 (1992) 33
